BSc in Business and Economics 2012 - 2015

WORKING PAPERS

The Making of Momentum: A Demand-System Perspective (Job Market Paper)

Presentations: AFA Annual Meeting (scheduled), UCLA Anderson Finance Brownbag (2022), WU Vienna (2022)

Abstract: I develop a framework to quantify which features of investors' trading strategies lead to momentum in equilibrium. Specifically, I distinguish two channels: persistent demand shocks, capturing underreaction, and the term structure of demand elasticities, representing an intensity of arbitrage activity that decreases with investor horizon. I introduce both aspects of dynamic trading into an asset demand system and discipline the model using the joint behavior of portfolio holdings and prices. I estimate the demand of institutional investors in the U.S. stock market between 1999 and 2020. On average, investors respond more to short-term than longer-term price changes: the term structure of elasticities is downward-sloping. My estimates suggest that this channel is the primary driver of momentum returns. Moreover, in the cross-section, stocks with more investors with downward-sloping term structures of elasticities exhibit stronger momentum returns by 7% per year.

How Competitive is the Stock Market? Theory, Evidence from Portfolios, and Implications for the Rise of Passive Investing, with Valentin Haddad and Erik Loualiche

WFA 2022 Elsevier Best Paper on Financial Institutions 2021 Q-Group Jack Treynor Prize

Abstract: We develop a framework to theoretically and empirically analyze how investors compete with each other in financial markets. In the classic view that markets are fiercely competitive, if a group of investors changes its behavior, other investors adjust their strategies such that nothing happens to prices. We propose a demand system with a flexible degree of strategic response and estimate it for institutional investors in the U.S. stock market. Investors react to the behavior of others in the market: when less aggressive traders surround an investor, she trades more aggressively. However, this strategic reaction is not nearly as strong as the classic view. Our estimates suggest that when a group of investors changes its behavior, the response of other investors only counteracts half of the direct impact. This result implies that the rise in passive investing over the last 20 years has led to substantially more inelastic aggregate demand curves for individual stocks by about 15%.

TEACHING

UCLA Anderson School of Management (Teaching Assistant)	
MFE Statistical Arbitrage, Prof. Valentin Haddad	Fall 2020 - 2022
MFE Advanced Stochastic Calculus, Prof. Stavros Panageas	Fall 2019 - 2020
MFE Financial Risk Measurement and Management, Prof. Valentin Haddad	Spring 2019 - 2022
MBA Foundations of Finance, Prof. David Wessels	Winter 2022
MBA Corporate Finance, Prof. Antonio Bernardo	Winter 2019
Vienna University of Economics and Business (Teaching Assistant)	
MSc Microeconomics, Prof. Alexander Mürmann	Spring 2017
MSc Statistics, Prof. Kurt Hornik	Fall 2016

NON-ACADEMIC WORK EXPERIENCE

VOIV HERBENIE WORLD ENDERVOE	
Predictive Analytics at Austrian Post Data Science Intern	June 2017 - August 2017
WU Trading and Investment Society Head of Trading Team	May 2016 - June 2017
Rating Model Validation at Raiffeisen Bank International Quantitative Credit Risk Analyst	March 2015 - December 2016
Internship at Biomin Singapore Management Trainee	August 2013 - September 2013

ACADEMIC WORK EXPERIENCE

UCLA Anderson School of Management	November 2018 - February 2019
Research Assistant for Prof. Valentin Haddad	
Research assistance for Boyarchenko, Haddad and Plosser (2018,	WP)

FELLOWSHIPS & AWARDS

WFA Elsevier Best Paper for "How Competitive is the Stock Market?"	2022
Q-Group Jack Treynor Prize for "How Competitive is the Stock Market?"	2021
UCLA Anderson Fellowship	2017 - 2021

WORKSHOPS

MFS-Wharton Virtual Summer School: Open Questions in Macro Finance	August~2020
Macro Finance Research Program Summer Session for Young Scholars	July 2020
Financial Market Insights: Demand System Asset Pricing	June~2020
Financial Economics of Insurance	June~2020
Princeton Initiative: Macro, Money and Finance	September 2019

SKILLS

Computing R, Julia, Python, SQL, git

Languages German (native), English (fluent), Czech (basic)
